Hamilton's Principle and Lagrange's ... - Duke University

6 Solving the first one for s and substituting in the second one, we find after some rearrangement $s = \frac{M+m}{M+m\sin^2\theta} g \sin\theta$ This is a constant acceleration, so it is easy to find s at any time Note that as $\theta \rightarrow 0$ this gives $s = g \sin\theta$, as it should, since the wedge will not move For the acceleration of
